

Entry level servers for your business

HP ProLiant ML110

More than ever small businesses are pressured to reduce the cost of their IT infrastructure. Tight purse strings drive drastic measures; budget constraints have prompted some companies to use misappropriated desktop PCs as basic small office servers.

The ProLiant ML110 solves the dilemma of functionality vs. price. As a true server, the ML110 boasts Error Checking and Correcting (ECC) memory,

fully functional gigabit networking, and necessary PCI-X technology. The ML110 is specifically designed for and relentlessly tested with server operating systems in demanding server configurations. Planning for growth, the ergonomic chassis makes addition of memory, drives, and devices elegantly simple. All of this is available at the same price of the misapplied desktop PC.

HP ProLiant M150

The affordable ProLiant ML150 G2 is a remarkable value for workgroups or small-to-medium businesses that need dependable server performance and trusted service and support.

Designed with value in mind, the ProLiant ML 150 G2's ample expansion capabilities ensure excellent server performance both today and tomorrow. The optional HP ProLiant ML150 G2 Lights-Out 100

Remote Management Card allows you to remotely monitor server health and react responsively to events, should they occur.

Delivering appropriate server functionality at an aggressive price point, the ProLiant ML150 G2 is a remarkable value for your growing organization.

ProLiant ML310

The HP ProLiant ML310 G3 is an affordable, single processor tower server designed to provide the solid network foundation essential to fuel thriving small offices.

Dual-Core Intel® Pentium® D or Pentium® 4 processing power combines with industry-leading management and essential data protection features for a secure, affordable platform that helps you run your business efficiently.

Integrated Lights-Out 2 provides unmatched remote management capability. Your support team can configure and manage the server from any location - local or remote. Required installations and updates happen quickly, saving your business valuable time.

HP ProLiant DL320

The HP ProLiant DL320 server is designed with all the performance, management and serviceability that you expect from HP ProLiant servers. The 1U size and one-way processor capability provides a cost efficient solution for single function and front-end applications such as web hosting.

Key Benefits

Increase server availability and reduce cost with Integrated Lights Out (iLO) standard on all models.

HP SmartStart radically simplifies high volume server deployment. For enhanced I/O capabilities, this product includes one 64 bit/133MHz full-length slot, which is upgradeable to PCI Express x4 slot, and one 64 bit/100MHz half-length low profile slot.

Best in Class

Fastest 1P server and first to break 1000cc barrier on SPECweb99_SSL benchmark.
